AIR TITLE V FACILITY PERMIT

Effective Date: January 27, 2000

Expiration Date: January 27, 2005

Renewal Date: July 27, 2004.

Date to Start Renewal Application: Contact NYSDEC in February 2004 to ask about status of the renewal process and to get direction on how to proceed.

Copy of the Permit: Attachment 1

Current Status:

This permit contains operating limits, emissions, and general administrative requirements for both solid waste fired DBA boilers, the wood fired EFW No. 2 boiler, the gas fired EFW No. 1 boiler, and the oil fired 110 boiler.

Minor emission points such as the tipping floor roof vents, the maintenance shop ventilation exhaust fan, vents on chemical storage tanks, lime silo baghouse exhaust are considered trivial or exempt.

Currently there are no outstanding issues with respect to the air permit.
